

## 3D of Fiber Optic Patch Cords

### Overview

When producing fiber optic patch cord assemblies, manufacturers use 3D interferometer (which is an optical interferometry instrument) to check the fiber optic connector endface and strictly control the dimensions of the connector endface. The 3D test mainly measures the radius of. High-performing, reliable product solutions that transmit data, power and signal in cars, planes, power grids, appliances, electro. Download CAD drawings for our Fiber and Copper products Search by part number or description such as CAT5, CAT6, OSP, etc. more In this video, we use the FS single mode simplex fiber patch. The radius of curvature refers to the radius of the ferrule axis to the end face, as shown in the figure below, which is the radius of the curve of the end face of the ferrule. The curvature radius of the end face of the high-quality fiber jumper connector should be controlled within a certain. 10000+ "rack fiber patch optic" printable 3D Models.
