

Can network equipment be installed without a server rack

Overview

Not every network setup needs a full-size floor rack or dedicated server room. For home offices, apartments, small businesses and remote workspaces, wall-mount cabinets provide a practical way to organize networking equipment while conserving valuable floor space. Since networking equipment like switches and patch panels generates less heat, airflow in network racks focuses on avoiding cable obstruction rather than temperature control. Server rack enclosures feature high-grade physical security. Lockable doors, tamper-resistant panels, and restricted-access. Where do you guys put servers without a rack?

My lab space is limited, and I'm relatively new to this sub. Reliable fastening ensures the safe installation and durable support of expensive and vulnerable hardware. Pro Tip: Use rubberized anti-vibration pads.
