

Do you have 700mm wide cable trays

Overview

The 700mm cable tray is a widely adopted solution for organizing, supporting, and protecting electrical and data cabling across diverse environments. Choosing the right type. In practice, cable tray dimensions are a system of interrelated measurements —width, depth, length, and material thickness—that directly affect cable fill compliance, heat dissipation, structural loading, and long-term expandability. A tray that is too small will overheat and physically damage, and too large tray will drain the project budget. It is grounded on 40 years of experience in the manufacturing. REF. With unmatched quality and service, we offer a variety of styles, materials and finishes to support virtually any cable management. National Electrical Code (NEC) specifies the capacities of cables rated at 2000 volts or less in cable trays.
