

# How much does it cost to assemble a fiber optic router

## Overview

Basic: curb-ready fiber with existing outside conduit; indoor run under 50 feet; simple router provided by ISP — Total: \$600-\$1,000; labor 4-8 hours; materials \$100-\$200; equipment \$50-\$150. How much does professional network wiring cost?

Cat6 ethernet drops cost \$150-300 each including professional installation. Basic office needs 2-3 drops (\$300-900). Add \$200-500 for network panel and switch setup. Total professional office network: Homeowners typically pay a range for fiber installation, with the total amount driven by whether the service is already available at the curb, the length of the required drop, and whether internal wiring or equipment upgrades are needed. The main cost drivers are materials, installation time, and environmental factors that affect trenching, conduit, and terminations. This Network installation costs vary significantly, ranging from \$2,500 to \$6,000 or more, as there's no one-size-fits-all network cable installation pricing model. Each project's unique requirements play a significant role in determining the overall cost. This guide will walk you through the key factors. In May 2026 the estimated national average cost to Install Home Networking starts at \$265 - \$644 per access point. Use our Cost Calculator for cost estimate examples customized to the location, size and options of your project.
