

Installation of Low-Voltage Intelligent Distribution Box in Niger

Overview

The project, which will benefit the three main districts of Niamey, includes 260 kilometers of low-voltage cables, the erection of 4,404 concrete poles, and the dismantling of part of existing 4X16mm 2 lines, and will improve access to electricity for at least 500,000 people. Recently, SINOSOAR's West Africa branch in Niger has successfully won the bidding for the EPC project of upgrading a low-voltage distribution power line in Niamey, the capital city of Niger. This project is another important project signed by SINOSOAR with the client NIGELEC after the Agadez. MNS is a low-voltage switchgear assembled in the factory using standard modules. It is suitable for AC 50/60Hz, rated operating voltage below 660V, and rated current up to 6300A in power distribution systems, used for power distribution, conversion, control, and reactive power compensation. The primary goal of relocating LVDCs underground is to mitigate issues such as visual pollution, space occupation, and safety risks caused by existing. 1,2,3,4of Electrical Electronic Engineering; School of Engineering Technology; Akanu Ibiam Federal Polytechnic Unwana, Afikpo, Ebonyi State, Nigeria. 5Federal Polytechnic Ugep, Cross River State. is a reliable Manufacturer, Supplier, and Exporter of LV Panels in Niger. Whether you design, build, operate or service buildings or critical facilities, discover four ways to manage today's.
