

Low-voltage complete sets of equipment qualification application

Overview

Applications may be obtained from DLSE or online at www. This specialized field requires contractors and technicians to obtain specific licenses that demonstrate their competency in handling complex electronic systems safely and effectively. The licensing process varies significantly by state, with some requiring comprehensive examinations, proof of education in addition to the dates of employment and a brief description of original reference forms from people that have knowledge of your work are required. No copies will be accepted, as the form must include the notarized original. Alarm System Requirements: A statewide license is required for any person, sole proprietorship, company, or corporation that provides sales, installation, maintenance, or monitoring of burglar alarm systems, access control, and closed-circuit TV systems. Please continue to visit our website for updates on the new procedures for scheduling.
