

Methods for Selecting Fiber Optic Fibers and Cables

Overview

Understand how to choose fiber optic cable by comparing single-mode vs. multimode, network speed and distance needs, cable jackets/fire ratings, connectors, cost and future-proofing for data and telecom networks. Fiber optic cables can be custom cut by Proterial Cable America or distributor to match your required lengths for each cable run. Additional factors include cable length, indoor vs outdoor use, and protective coatings for added durability. But when it comes to selecting the right fiber optic cable for your environment, there are several key considerations and a variety of attributes to choose from, ranging from type of fiber and strand count to construction and application. Unlike copper wires, which are limited by lower data transmission speeds, shorter transmission distances, and higher susceptibility to electromagnetic interference, fiber optic cables offer unparalleled performance and can.
