

Price of Railway Communication Optical Cable Jacking Pipe

Overview

Pipe jacking is a technique used to lay underground pipelines without excavating the entire length of the pipeline. In this method, a tunnel is constructed, and the pipeline is pushed into the newly formed tunnel using a pipe jacker machine. The pipes are usually concrete pipe, steel pipe. The answer often lies in Bore and Jack, also known as Pipe Jacking - a cornerstone of Trenchless Technology. This precise method allows for the seamless installation of conduits and culverts, minimizing disruption where traditional open-cut methods are simply not feasible. offers a full range of trenchless tunneling services that will handle your project's tunneling requirements. Whether you need a sewer or utility line installed or cleaned, casing pipe placed under a railroad. Pipe Jackings provides San Jose, CA with underground utility and infrastructure construction services via tunnel construction services, horizontal auger boring and (HDD) horizontal directional drilling more commonly called directional boring. We provide underground utility construction services.
