

## Remotely configure core switch ports

### Overview

Let's configure the switch: Download PuTTY. Using the PuTTY navigation, expand "Connection" then select "Serial. " Enter the port number inside the "Serial line to connect to" text. I am looking for some guidance on how to configure a server port on our core switch. For some options, I was thinking this: Option A no switchport no ip address Option B switchport switchport access switchport access vlan 105 or does this accomplish the same thing?

04-24-2023 11:54 AM Hi Second. The Cisco Command-Line Interface (CLI) is a core tool used by network administrators to configure and manage Cisco devices such as routers and switches.
