

Router fiber optic cable cannot be unplugged

Overview

Verify that you are using the correct type of fiber optic cable for your router. If the problem persists, consider contacting your service provider for assistance and possibly a cable . Unplugging a fiber optic cable from a modem is a task that requires careful handling to avoid damaging the delicate fibers within the cable. Fiber optic cables are different from traditional copper cables, as they use light to transmit data, and the connectors are more sensitive. Also the connector requires an 8 degree polish to reduce back reflection to the equipment. With delicate glass components and invisible laser operation, caution is necessary. Customer: My AT&T fiber is not working Technician's Assistant: Have you tried unplugging your modem and router, then plugging them back in after 1-2 minutes?

Customer: I only unplugged it at the wall.
