

Router needs to be modified after fiber optic conversion

Overview

Yes, you can often use your existing router with fiber optic internet, but there are crucial considerations. Understanding compatibility, potential limitations, and when an upgrade is necessary will ensure you get the most out of your high-speed connection. The numbers were much improved, and for a moment, it really did feel like I finally fixed my (semi-useless) internet connection for good. This guide will break down everything you. Fiber internet requires a device called an Optical Network Terminal (ONT) to convert the light signals from the fiber optic cable into electrical signals that your router can understand. I'm Fazlay Rabby — the founder and writer behind Thewearify. For years I have tracked the latency. When I enter the IP address of the mesh network (192. It is still doing router stuff.
