

Which is better a router or fiber optic cable

Overview

Fiber is faster, highly reliable, more durable, and great for cloud-based or real-time work. Cable is cheaper to install and more accessible but can get slower during busy hours due to shared bandwidth and asymmetrical speed. Right now, fiber internet has the fastest plans and symmetrical speeds, but that's probably going to change in the next several years as cable internet incorporates new technology enabling multi-gig symmetrical speeds. Plus, it's more widely available than fiber. the. Choosing between cable and fiber internet can feel like deciding between a trusty old router and a shiny new modem both get the job done, but one might just blow your bandwidth expectations out of the water. This guide breaks down everything you need to know about cable and fiber optic. Compare fiber vs. Learn the pros and cons in this guide.
